

SALFORD 201

TITANIUM DIOXIDE

Description : SALFORD 201 is a universal rutile titanium dioxide pigment, manufactured by the chloride process, (TiO₂) pigment with more than 10 years of proven performance in high-temperature applications with a warm-white tone.

- Key Feature :**
- Maximum lacing resistance for high-temperature processes
 - Simple surface design for applications that require low additive content
 - Neutral undertone for creation of warm-white tones

Application : SALFORD 201 is recommended for evaluation in:

- High-temperature cast and extrusion coating films
- Extrusion coated paper
- High-quality color masterbatch

Product Characteristics :

Production	rutile pigment produced by chloride process
Surface treatment	alumina compounds
TiO ₂ content(DIN EN ISO 591)	≥97%
Standard classification	R2
ASTM D 476	Type II,III&IV
Density (DIN EN 787-10)	4.2g/cm ³
CIE L* , dry powder (GB/T 5950-2006)	99.0%
Bulking value *	0.25 l/kg (0.03gal/lb)
Oil absorption (DIN EN ISO 787-5)*	18g/100g pigment
Color index	Pigment White 6(77891)
CAS No.	13463-67-7
